

OSAF Update

OPEN SOURCE APPLICATIONS FOUNDATION

Chandler Update

- Chandler 0.6.1 bug fix release - February
- Dogfooders
 - Mitch/Esther
 - Personal calendars
 - Shared office calendar
- Feedback/suggestions via design list and bugzilla
- Dogfood feedback informing work for 0.7

Chandler Next

- Chandler 0.7 in progress
- Staged features over 3 alpha milestones
- Release Tenets:
 - Bug fixes and enhancements for current users
 - Support light-weight scheduling and free-busy workflows
 - Implement plausible Dashboard focused on task management
- Data migration
- Performance
- Solid sharing

Scooby Update

- Scooby 0.1 released
- Targeting developers
- AJAX web app
- Experimental web access to calendars for Chandler users
- Basic calendar functions
- No explicit subscribe, publish workflows
- Not yet a stand-alone web app

Scooby Next

- Scooby 0.2 in progress
- Working towards a dogfood usable release
- Focus of viewing rather than editing
 - Recurring events
 - Event status
 - Overlapping events
 - Start on timezone support
 - Non-Chandler users can view a read-only calendar

Cosmo Update

- Cosmo 0.2.8 - released in March
 - Improved stability
 - Production backend for Foxmarks
- Cosmo 0.3 - releasing this week
 - CALDAV reports
 - Repository browser
 - Atom Feeds
 - Scalability improvements

Cosmo Next

- Cosmo 0.4
 - Very short release
 - Chandler free-busy reports
 - Minor bug fixes and enhancements
- Cosmo 0.5 in initial planning phase

Ecosystem Product Planning

- Further refining the 1.0 roadmap
- Targeting Beta 1.0 in 1 year
- Focus on ecosystem usage
- Driving adoption for Chandler and non-Chandler users

Questions for CSG

- To what extent have people already filled the needs determined at the beginning of the project?
- Is there still a window of opportunity or has that closed?
- If we were to have something in early 2007, what should that be?
