

Next steps – at my institution

Meet with exec group; support

VMware w Princeton...exchange...

CIOs join the consortium

Create mobile app consortium

Deep benchmarking...costs of providing services

Buy concrete services...

Pilot advocacy project (streaming academic content)

Set up processes for negotiating with vendor

Connect with library community

DuraSpace, DuraCloud

Form mobile computing group

Connect on virtual computing labs / services

Propose building / acquiring data center / explore together; RFP to service providers

NSF; datanet consortia; large distributed storage; bring into conversation

Next Steps – for CSG

Poll – new consortium

Reach out to RUCC +1

CSG as “energy source”; membership beyond CSG members

Lawyer thing...

Ongoing role for CSG as oversight review

Create matrix of opportunities; regular updates / reports

Recommendation from sourcing group; let others know ongoing negotiations / inventory of license – agreements

Select “low hanging fruit” ... mobile apps, other

Prototype of ultimate board; proposal reviewed by CSG; draft charter (specification) RFI; sponsorship needed

Principles: Assume trust (compact, covenant) “violent agreement”; aggregation brings efficiencies

Use of existing group/mechanism for this effort

Rank attributes

Major stakeholders

Importance of determining templates;
anticipation of key needs; default path

Small group develops charter (before end
of June?); those involved should be those
who plan to be part of it; continuity from
legal and governance groups

Evaluation

Almost lived up to name: solutions

One session in this format; not all

Figure out how to keep a thread going vs
next meeting on another subject

Plan agenda close to meeting timeframe

Curator concept
